

+PATIENT DATA

+NO ONE GETS YOU CLOSER

TrialMax Touch™ Home-Based eDiaries

Overview

CRF Health is a leading global electronic Patient Reported Outcomes (ePRO) solutions company for the life sciences industry. Founded in 2000, we aim to help bring new drugs to market quickly, cost-effectively, and safely through the collection of clean ePRO data. With cutting-edge ePRO services and delivery capabilities, we're driving the change to more efficient paper-free trials.

CRF Health uses eDiaries on leading mobile device platforms for collecting patient data.

What is TrialMax Touch™?

This is CRF Health's handheld eDiary device for home- and site-based data collection. TrialMax Touch™ runs on Smartphone devices and is used to collect patient reported outcomes electronically in clinical trials.

Benefits of TrialMax Touch™:

- User-friendly eDiary devices with high-quality touch screens
- eDiaries that will automatically guide subjects during unsupervised at-home data collection
- Automatic time stamps support regulatory submissions
- Data collected according to study protocol via branching logic, edit checks, and alarms
- Complex calculations can be utilized to support eligibility criteria, dose titration, etc.
- Use of images and colors to guide patients through study routines
- Large screens, buttons, and text for demanding patient populations
- Extensive language support for deploying eDiaries globally without limitations
- Proven and flexible global network connectivity via combination of GSM, GPRS, 3G and landline technologies
- Data collected in accordance with 21 CFR Part 11 and other US and international laws and regulations
- Immediate and automated transmission of data for real time review by sites and study teams

Types of eDiaries:

- Daily diaries
- Site-based questionnaires
- Capture event-based data such as in Overactive Bladder studies

TrialMax Touch™ Home-Based eDiaries

Features & Benefits of TrialMax Touch™ ePRO Devices

Data Sending Options with TrialMax Touch™ ePRO Devices

- Wireless built-in
- Landline with external modem
- Global network configuration programmed in every device – allowing devices to move from country to country

Screen Sizes

- Range from 2.8” to 4.3”

Battery Life

- TrialMax Touch™ devices include a smart battery management feature, extending standby time to several days or even weeks with some devices. Built-in battery monitoring system.

Language Support

- CRF Health’s ePRO technology has been used in more than 70 countries, on six continents and 68 regional languages, including several regional Indian dialects.

Expandability

- Landline modem
- Medical devices

Memory and Performance

- Fast processors ensure smooth page transitions and a good user experience
- Our devices use a memory management system called Persistent Memory Storage that maintains data even when all power is drained from the battery

PRO Data Entry Options

- VAS scales
- Ordinal scales
- Likert scales
- Radio buttons (select a single option)
- Checkboxes (multiple selections)
- Numeric spin controls
- Time and date spin controls – local formats supported (AM / PM & 24h format)
- Image maps – tap on image to make a selection
- Audible alarms
- Context-sensitive reminders and instructions

Integration with EDC and Medical Devices

- Medidata Rave®
- TrialMax Synapse™ Open Interface
- Glucometer
- Spirometer
